

GemiFill DF

Drum & IBC filling machine

TYPICAL FEATURES

- Filling into 25 ltr. (jerry)cans, 200 ltr. drums and/or 1.000 ltr. IBC containers.
- Filling by means of a pneumatic or electric pump (frequency controlled).
- Filling directly on a floor scale or by means of a scale integrated in a roll conveyor system (driven or non-driven).
- Simple to operate batch controller (with self-learning parameters).
- Movable filling valve / diving nozzle for positioning above the bunghole of the drum. This enables filling directly on the pallet to avoid handling of heavy loads.
- Suitable for non-foaming (top fill) & foaming (bottom fill) products.
- Non-explosion proof or explosion proof in accordance with ATEX.
